

Software Structured Design & Architecture

Project Evaluation & Presentation Plan

Your project team will be split into two groups, the evaluation group with two members and the design group with the others in the team. The evaluation group is responsible to evaluate the architectural design of the project next to yours in the list below using the ATAM approach. While the design group is going to work with the evaluation group from the project team above yours in the list to complete the evaluation of the architecture of your system. Both groups (from different project teams for the same system) will present your work (design + evaluation on an identical system) as scheduled in class, and finally submit your evaluation report.

Project List for Evaluation Assignment and Presentation Roster:

[For example, the evaluation group from Project 1 is going to evaluate the architectural design of Project 2's system with their design group; and Project 1 should be evaluated with the evaluation group from the project in the end of the list.]

The presentation date of each project is also scheduled as below. Your presentation may last no more than 15 minutes, i.e., 10 minutes for design + 5 minutes for evaluation. Note that if you missed the scheduled date, your team would have NO further chance (time slot) for the presentation!
